INTRODUCTION

"My name is Apinya Kanuenghan, a fourth-year Computer Engineering student at King Mongkut's Institute of Technology Ladkrabang, Prince of Chumphon Campus. I am deeply passionate about UX/UI design, with a primary focus on creating websites and applications that deliver an exceptional user experience. My goal is to leverage the knowledge and professional experience gained from working with a company to further refine my skills. I am committed to developing efficient, high-quality solutions that authentically meet the needs of every user."

EDUCATION

**King Mongkut's Institute of Technology Ladkrabang
Prince of Chumphon Campus**
Bachelor of Engineering Program in Computer Engineering
GPA: 3.23

PROJECT

Beauty Pageant Information System
Beauty Information System (BIS) is a system developed to manage beauty pageant information. Applicants can apply for the competition through the online system, and their data are stored systematically for easier management and verification. In addition, the system displays news, schedules, and event details on the website, and also provides space for sponsors to promote their brands.
Responsibilities: Worked as a Business Analyst, designed the system's website, and performed system testing (Tester).

Café Management System
A cafe management system that allows ordering beverages and desserts through a Touch Screen interface. Purchase data are stored in an SQLite database. The system supports employee check-in and check-out using RFID cards and displays daily sales data through a Dashboard
Responsibilities: Designed the system's website and developed the frontend.

Collect Point System
A food ordering system that customers can accumulate points. Admin can add, remove, or manage menu items and other orders
Responsibilities: Designed the system's website and developed the frontend.
